WORK EXPERIENCE

- **FAPIhub / Founder** 2023 - PRESENT
 - Built the platform from scratch using Python and Django
 - Monetized my APIs and managed users, subscriptions, and usage limits
 - Worked with VPS servers and maintained Nginx
 - Built an admin dashboard to add and manage APIs without changing code
- **MagicAPI - Software Engineer** 2024 - 4 months
 - Developed OOP Python function handlers on AWS Lambda.
 - Created private plans and specific APIs, improving user customization options and used replicate models to save time and reduce the cost margin.
 - Automated deployment using GitHub commands and CI/CD tools.
 - Collaborated with team to use Apollo for user attraction and implemented customer feedback tools.
- **EvoSoft** 2025 - Present
 - Participated in the Evosoft Evocampus training program
 - Learned how to use Git for version control in a team environment
 - Worked with Azure Team Place for task tracking and team collaboration
 - Created and reviewed pull requests as part of the development workflow
 - Learned basic testing using Robot Framework
 - Used SonarQube to check code quality
 - Learned how to handle and resolve Git merge conflicts
- **RapidAPI** 2023 - Present
 - Sold multiple AI APIs on RapidAPI, including image, video, and content tools
 - Built and managed APIs such as Background Remover, FaceSwap, Upscaler, and others
 - Currently run an AI Background Remover API, ranked 2nd on RapidAPI
 - Reached 5,000+ total subscribers across all APIs
- **Mobile Development**
 - **Taxi App:** Developed a taxi app using Dart, featuring driver and client modules, real-time tracking, and admin panel. See on Github
 - **CalVault - AI Calorie Tracker:** Take photo of your meal and get instant, accurate nutritional information. See on calvault.app
 - **Tavi - AI Detector:** AI content detection mobile app. See on Google Play
